

In regard to proceeding 02-278: Please do not take away my privacy from being tormented with telemarketers. We were in a situation where I hated to hear a telephone ring! I had reached a point where if I answered and it was a telemarketer, I became hostile and hung up on them. That is not my nature, and that bothered me. I was considering discontinuing my telephone service, and go completely cellular, but that was impossible, also. After being put on the list to have such calls eliminated, I have had only local organizations solicit over the phone; and those are the ones I donate to, anyway. Life has become so much more pleasant without the others! Please do not change that!
